

Manucontract New Features

Seamless Contract Drafting With Manucontract MS Word Plug-in

Draft Contracts Effortlessly, using your familiar MS Word environment. It's simple: Download the Manucontract Word Plug-In; Install it; And Start Drafting!

The Plug-In is compatible with MS Word 2013 and above versions. You can use our 65K+ clause library and save the final draft on your Manucontract account from MS Word itself.

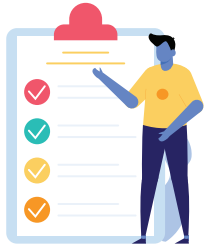

Email integration for Effortless Drafting

Wish to share drafts within the team and externally without the need to download and attach files?

Share drafts from any stage of the workflow directly via email. Just click the email icon, enter the email ID(s) and let Manucontract do the rest for you.

Select Clauses from past contracts to Draft effectively with Manucontract

Now, with Manucontract, you can utilize clauses from contracts in your repository when creating a draft.

Just select the 'personalized' button while drafting and choose the clauses that suit your needs!

Navigating Tricky Clauses

Some contract clauses demand special attention, such as payment and confidentiality.

Navigating these during contract drafting and execution can be tricky. Our tool simplifies this by highlighting crucial clauses with an indicative icon right at the creation stage. Keep an eye out for it next to the clauses in Contract Creation!

Manage your Team Assignments with Manucontract

Assigning tasks to the appropriate team members and reorganizing these assignments are key aspects of contract lifecycle management.

With Manucontract, effortlessly allocate the entire contract, or, for safeguarding sensitive content, handpick specific clauses of a contract, to team members. Use the un-assign icon to reorganize task assignments as needed
